COMSUPPLY.COM.AU

- Maximum capacity of 100kg for glass panels and 150kg for timber.
- Open Bar is available in Matt Black powder coat and Brushed Satin Stainless Steel.
- Open Round and Open Square Rail is available in PVD Black and Brushed Stainless Steel.

OPEN BAR RAIL TIMBER

Brio's new flat bar system for their Open Rail Range offers a barn door solution for panels up to 80kg in weight and 1.25m in width. This easy to install system uses a precision bearing and nylon tyre which rolls smoothly over a flat bar rail. The face fix straps and rail are available in stainless steel with a brushed satin finish or in mild steel with a textured, matt black powder coat.

Standard kits include length of rail, hangers, door stops and guide for single panel applications.

A joining bracket is available to dress bi-parting applications where two door systems are used. A soft close option is also available to suit the Open Bar Rail.

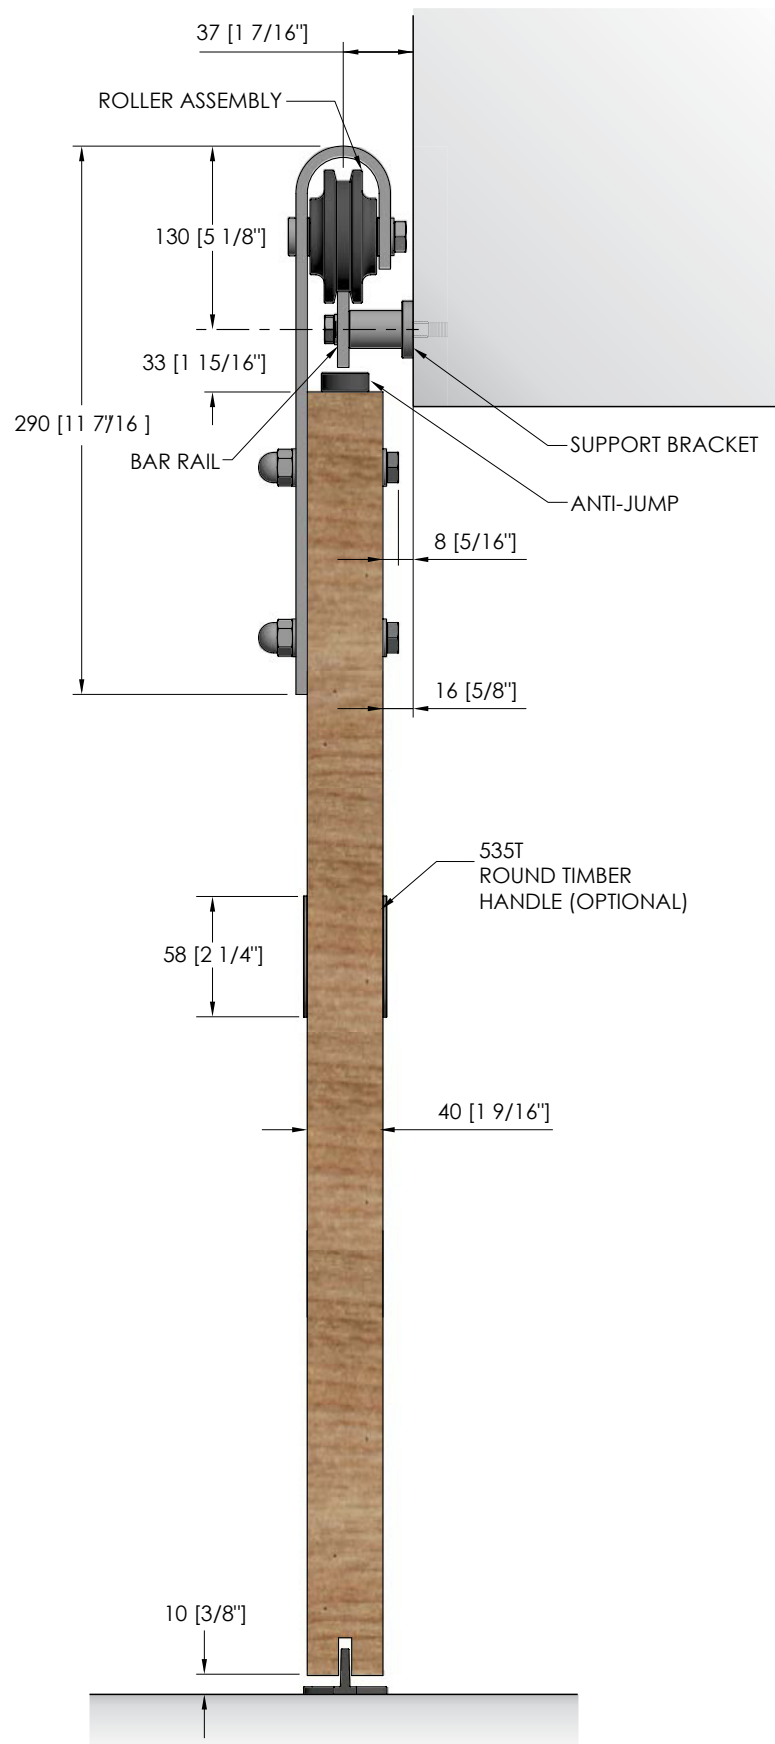

Timber doors by Hume Doors are also available through Comsupply.

OPEN ROUND RAIL GLASS

Frameless glass panels create a timeless style suited to today's minimalist trend. Whether in an office space or bathroom suite, Brio's Open Round Rail Glass will enhance a minimalist appearance with 304 stainless steel strap fixings and exposed rail design. The soft stop accessory and PVD black finish are also available, making this system even more desirable.

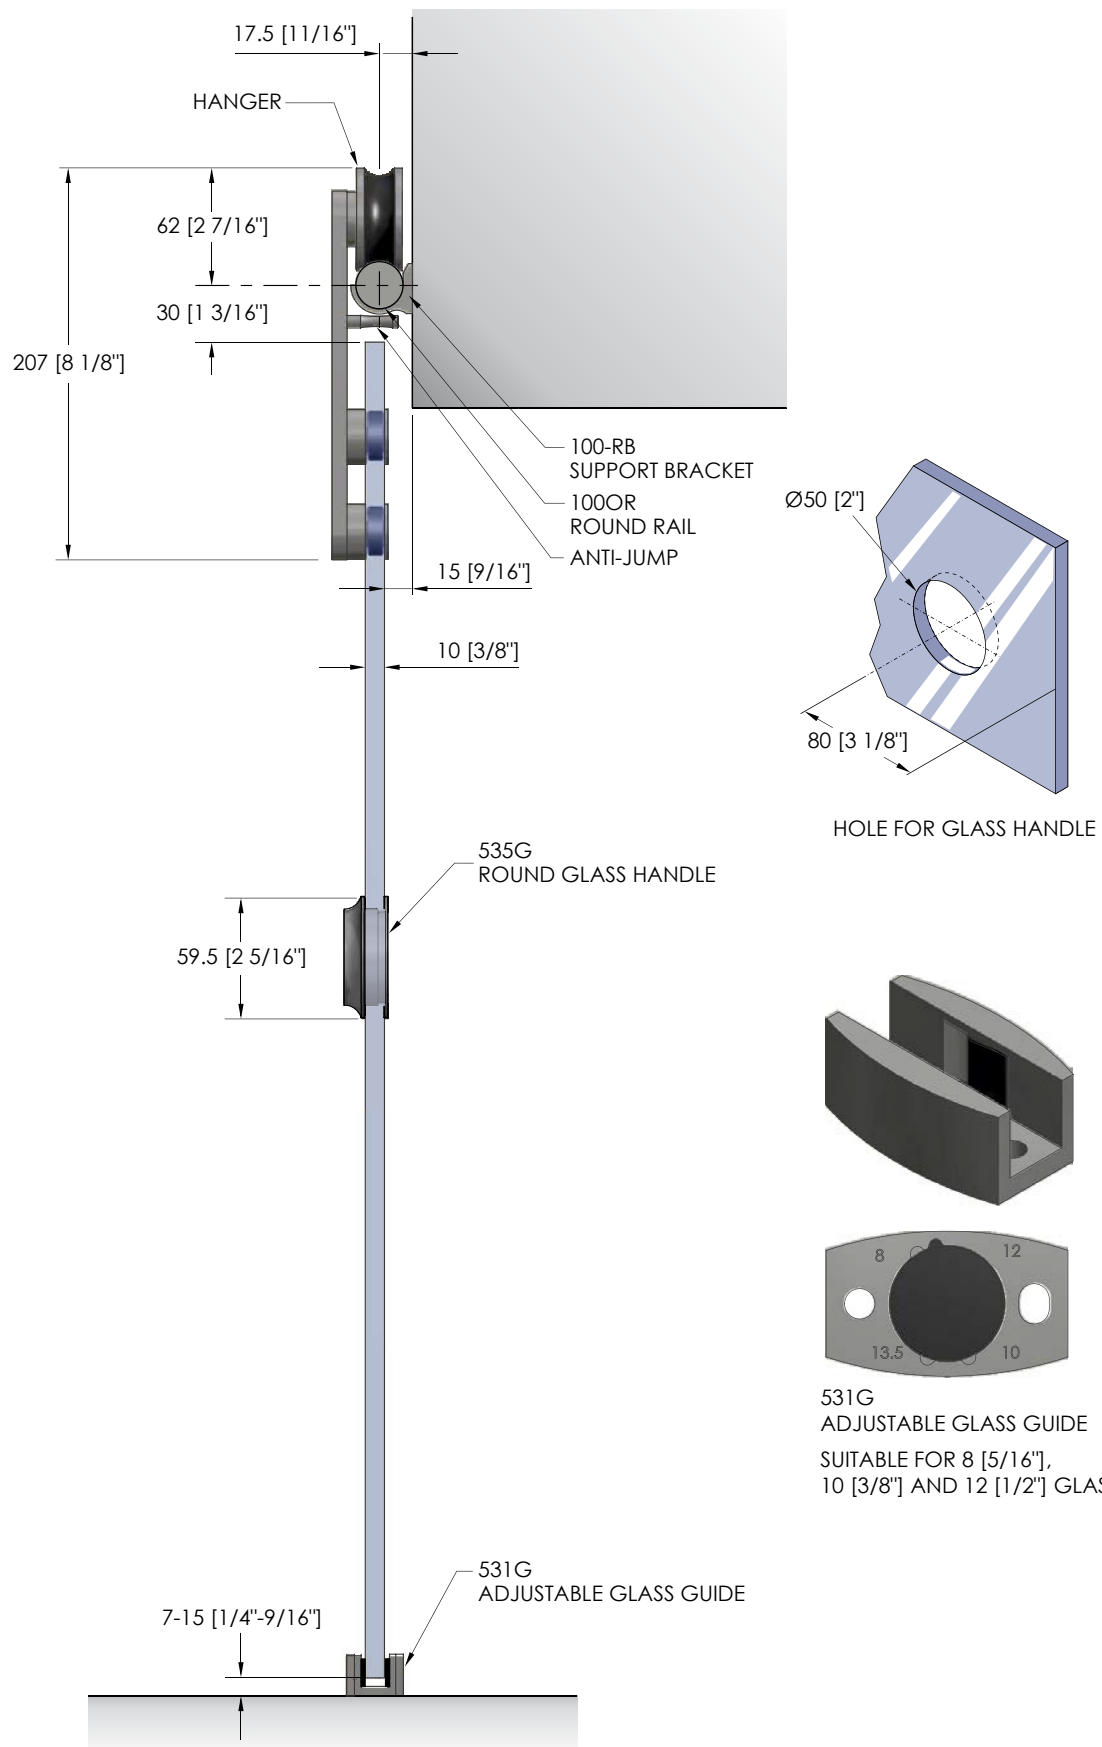

The universal stainless steel guide is suitable for toughened glass panels of 8, 10 and 12mm thick, up to a capacity of 100kg. The stainless steel round rail and sealed precision bearing with nylon inlaid tyre will perform effortlessly every time.

OPEN ROUND RAIL TIMBER FACE FIX

Brio's Open Round Rail system offers face fix hangers for timber panels 40mm thick and up to 100kg in capacity. The 304 stainless steel rollers utilise a sealed precision bearing with inlaid tyre which runs on a stainless steel, round rail which centralises the panel and conceals the support brackets.

Open Round Rail Timber and Glass systems are available in PVD black finish or brushed stainless steel. PVD black offers a contemporary aesthetic without introducing the risk of finish deterioration like powder coat can.

These systems are supplied with heavy duty door stops but can also operate with our soft stop accessory for either the left or right hand side of the opening. The soft stop performs as a damper which absorbs momentum of the door to produce a softer and quieter operation when opening or closing the panel.

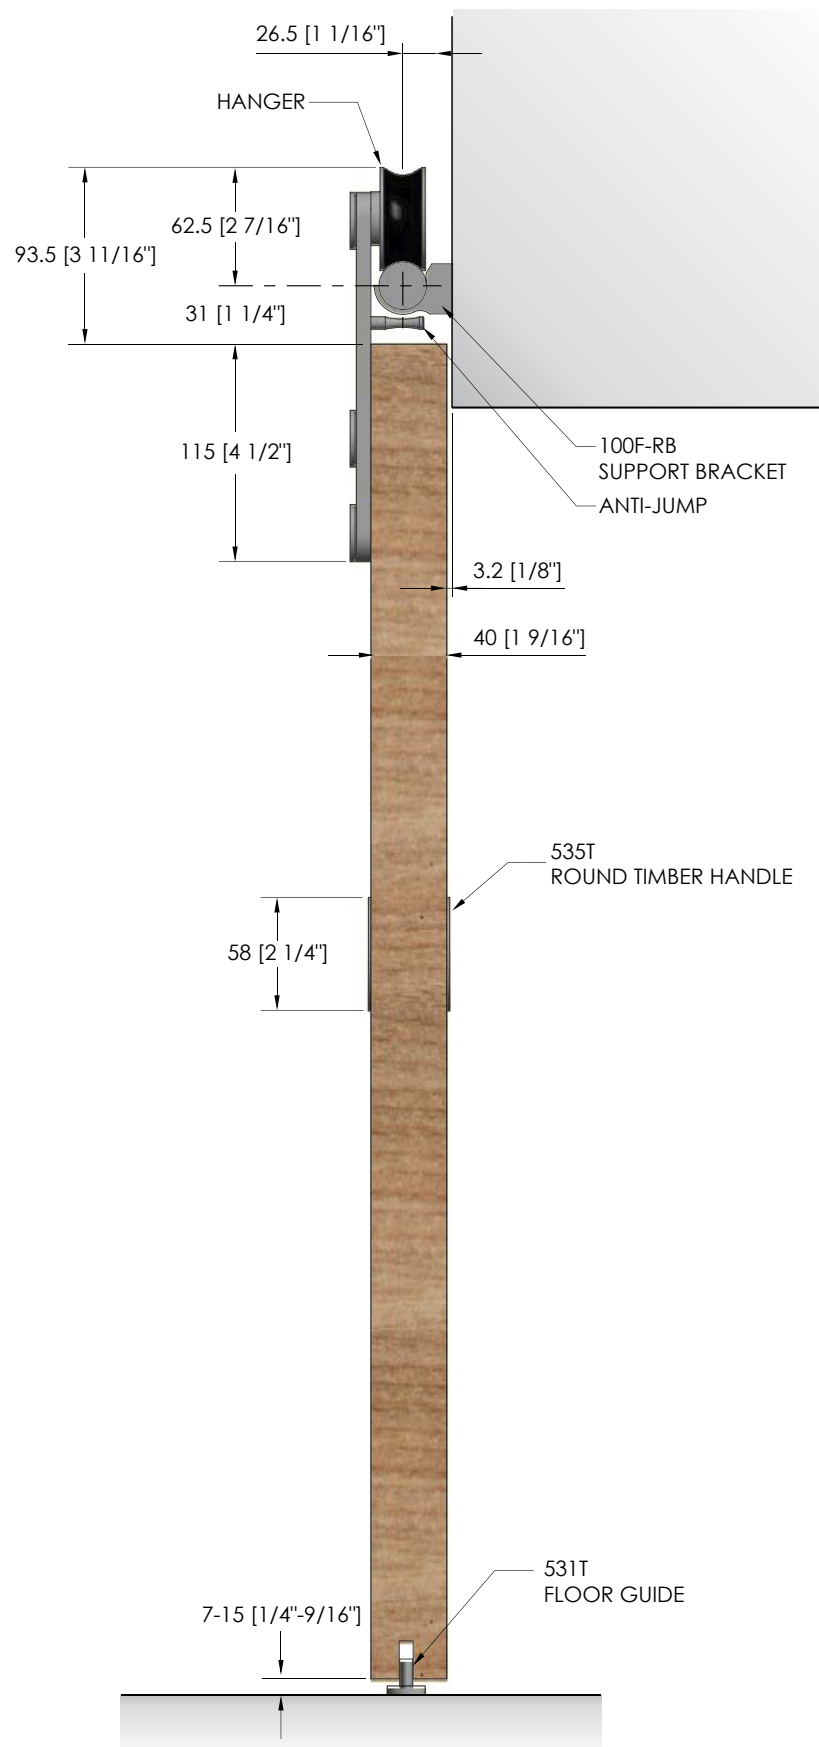

Timber doors by Hume Doors are also available through Comsupply.

OPEN ROUND RAIL TIMBER TOP FIX

With easy installation and exposed rail design, the versatile top fix system is suitable for timber panels in the home or office. Our sealed precision bearing and nylon inlaid tyre once again ensures the 304 stainless steel rollers will operate smoothly and quietly for years to come.

An array of bottom guide options make the Brio Open Round Rail Timber systems suitable for any application for panels up to 100kg. Open Rail Timber guide options are shown on page 11.

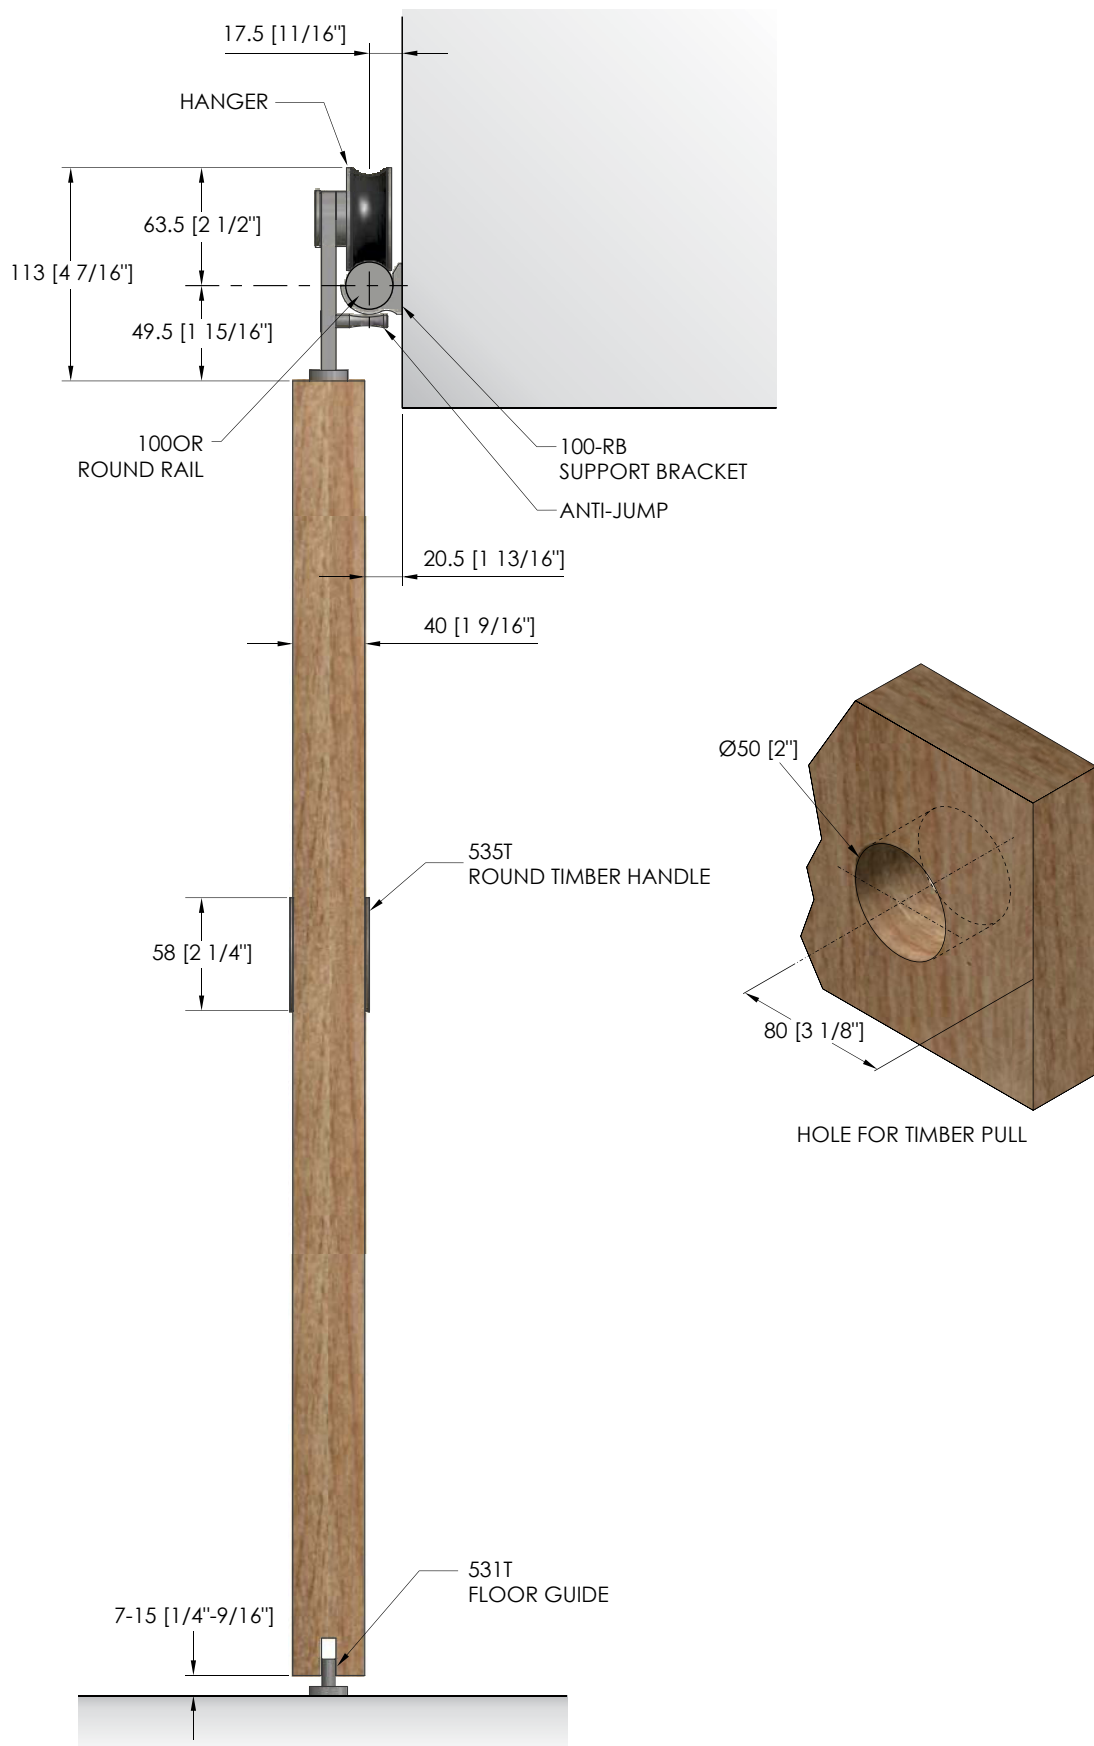

Timber doors by Hume Doors are also available through Comsupply.

OPEN SQUARE RAIL TIMBER

The heavy duty industrial appearance of the Brio Open Square Rail Timber will suit any contemporary interior and with capacity of 150kg and panels at 2m wide, the system is sure to impress. Exposed precision bearings and 304 stainless steel strap fixings offer a unique industrial aesthetic which is in high demand for residential and commercial applications. The Open Square Rail Timber system is also available in PVD Black making it a true stand out product.

Multiple guide options allow these large panels to operate with or without a floor channel and so interiors are enhanced with uninterrupted flooring.

Long life cycle and quality performance are assured with this robust system whether used in a rustic interior or modern workplace.

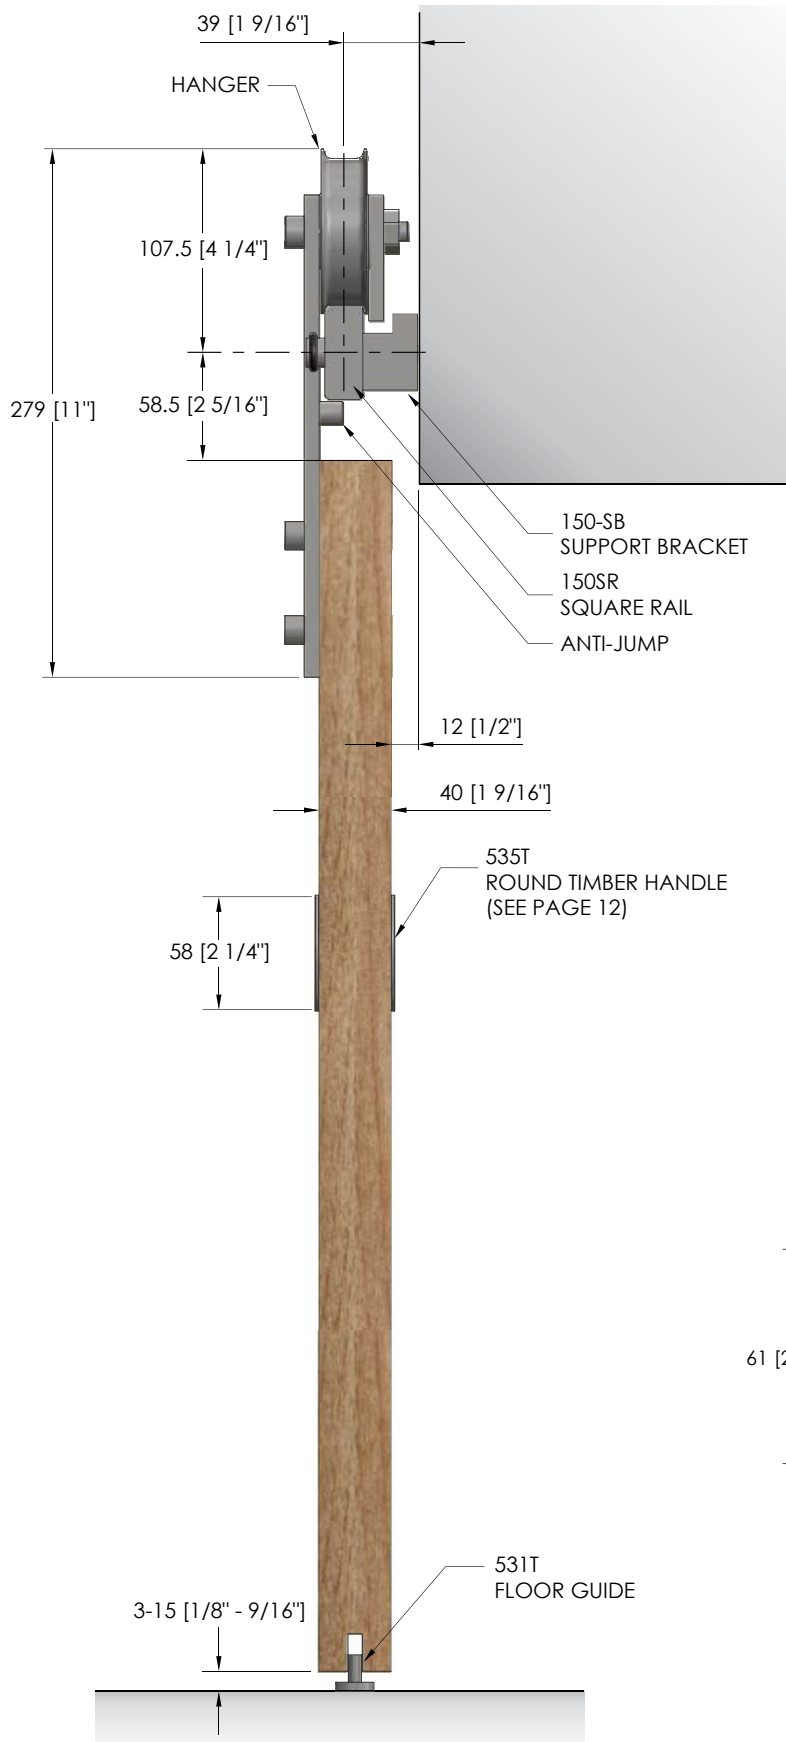

Timber doors by Hume Doors are also available through Comsupply.
