DOUBLE GLAZED VENETIANS

**UNIQUE, SLEEK & PROFESSIONAL.
THE PERFECT VISION CONTROL SOLUTION RIGHT WHERE YOU NEED IT MOST.**

Controllaview's double glazed Venetian panels are an optimal solution for a wide variety of applications ranging from residential to healthcare, commercial, correctional and educational.

Hermetically sealed double glazed units means Controllaview can provide a product free from control mechanisms that compromise competitors products and make them unsuitable for clean rooms or sterile areas.

The air tight seal also means the internal blinds require no cleaning and very little maintenance is required externally.

5 Year Warranty

* Min. width = Glass Thickness + 19mm Spacer + Glass Thickness

ELECTRIC DOUBLE GLAZED VENETIANS

FOR WHEN YOU NEED THE ULTIMATE VISION CONTROL SOLUTION.

Along with Controllaview's range of unique magnetically operated blind systems, we can also offer an electric Venetian unit, hermetically sealed with no external components.

This incredible product allows never before seen levels of innovation when it comes to your project. Suitable in all areas a normal unit can go, electric Venetians give you greater access to a wider range of glass options and sizes.

Available as a wall switch operated unit or with an optional remote, these are ideal for high end residential, correctional or high risk mental health where thicker than usual glass may affect operation of a standard magnetic unit. Available as a wall switch operated unit or with an optional remote, these are ideal for high end residential, correctional or high risk mental health where thicker than usual glass may affect operation of a standard magnetic unit.

* Min. width = Glass Thickness + 25mm Spacer + Glass Thickness
